

We are looking for Intermediate / Senior Web Developer for our Toronto office, to join our team of highly talented individuals to create dynamic, high-performance Internet-based and client-server applications.

The ideal candidate will have at least 5 years of experience developing dynamic web sites and applications using both Microsoft tools and technologies AND exposure to Web 2.0 languages and methods (AJAX, RoR, etc.). We are looking for proven pattern of technical accomplishments AND experience in learning and teaching new skills and techniques.

We offer wide variety of projects and assignments, great team environment, competitive salary and benefits, entrepreneurial management approach and multiple career advancement paths.

If you are flexible, enjoy technical challenges and are ready for constant learning, we want to meet you.

Required:

- Minimum of 5 years of .NET (VB and ASP) and ASP developmental experience including CSS and COM object development.
- Knowledge and experience of more than one of the following: C#, XML, Web Services, JavaScript, VB Script, Ajax, Python
- Track record in technical leadership and system architecture roles in above environments
- Minimum of 2 years development experience with MS SQL and/or Oracle DBMS
- Excellent communication, training and presentation skills
- Ability to execute several projects simultaneously

Optional:

- Flash development experience
- Experience in development of hand-held applications for Palm OS and Windows devices.
- Knowledge of OLAP, data warehousing and BI database reporting tools

Please e-mail your resume quoting position name in Subject field of the message to resumes@mediresource.com before March 31, 2007.

Only electronically submitted resumes will be accepted. No agencies, phone calls or faxes please.

We thank all applicants, however only candidates selected for interviews will be contacted.
